

4h0-002 Hyperion Solutions Certifications Hyperion Solutions hyperion essbase 5 certficaton

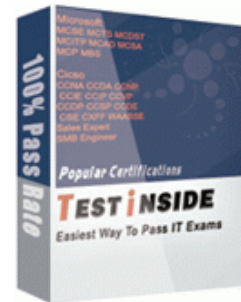

Practice Exam: 4h0-002 Exams

Exam Number/Code: 4h0-002

Exam Name: hyperion essbase 5 certficaton

Questions and Answers: 186 Q&As

([Hyperion Solutions Certifications](#))

Exam : [4h0-002](#)

"hyperion essbase 5 certficaton", also known as 4h0-002 exam, is a Hyperion Solutions certification. With the complete collection of questions and answers, TestInside has assembled to take you through 186 Q&As to your 4h0-002 Exam preparation. In the 4h0-002 exam resources, you will cover every field and category in Hyperion Solutions Certification helping to ready you for your successful Hyperion Solutions Certification.

Quality and Value for the 4h0-002 Exam TestInside Practice Exams for Hyperion Solutions **Hyperion Solutions Certifications** Certification 4h0-002 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 4h0-002 Exam.

4h0-002 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Hyperion Solutions Certifications product experts, included the current newest 4h0-002 examination questions.

3. 100% Guarantee to Pass Your Hyperion Solutions Certifications exam and get your Hyperion Solutions Certifications Certification.

If you do not pass the Hyperion Solutions Certification 4h0-002 exam (hyperion essbase 5 certficaton) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 4h0-002 Q&A ensure you pass the exam at your first try.

TestInside professional provide Hyperion Solutions Certifications 4h0-002 the newest Q&A, completely covers 4h0-002 test original topic. With our complete Hyperion Solutions Certifications resources, you will minimize your Hyperion Solutions Certifications cost and be ready to pass your 4h0-002 tests on Your First Try, 100% Money Back Guarantee included!

[Hyperion Solutions 4h0-002](#) Test belongs to one of the Hyperion Solutions Certifications certified test, if needs to obtain the Hyperion Solutions Certifications certificate, you also need to participate in other related test, the details you may visit the [Hyperion Solutions Certifications](#) certified topic, in there, you will see all related Hyperion Solutions Certifications certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 4h0-002 exam

4h0-002 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

4h0-002 exam questions updated on regular basis

Same type as the certification exams, 4h0-002 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 4h0-002 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo does not include the question's picture.

Exam : Hyperion Solutions 4H0-002

Title : Hyperion essbase 5 certification

1. What would defragment defrag a fragmented database?

- A. adding a dense member to the outline
- B. adding a sparse member to the outline
- C. changing a member formula in the outline
- D. redefining a Stored dense dimension member as Dynamic Calc and Store

Answer: A

2. Which file descriptions are correct?

- A. basic.otl contains the outline
- B. ess00001.ind stores data blocks
- C. basic.esm is a storage manager file
- D. basic.mdb is a partition definition file
- E. ess00001.pag stores the database index

Answer: AC

3. When would disabling data compression be recommended?

- A. when the average block density is very low (<3%).
- B. when the average block density is very high (>95%) and few consecutive repeating values exist.
- C. when the database contains many consecutive zero values or other consecutive repeating values.

Answer: B

4. The BeginArchive and EndArchive commands are used for which procedure?

- A. Exporting only a partial area of a database.
- B. Backing up Essbase files while Essbase is still running.
- C. Backing up Essbase files after Essbase has been shut down.
- D. Shutting down Essbase and making a complete backup of the current database.

Answer: B

5. During calculation, what is the calculator cache used for?

- A. for storing blocks
- B. for tracking index page usage
- C. for storing dynamically calculated values
- D. for tracking calculation progress through the blocks

Answer: D

6. Given the following database statistics, what is the block size?

Dimension Name Dense/Sparse Number of Number of
Members Stored Members

Year Dense 20 12

Measures Dense 16 8

Product Sparse 22 19

Market Sparse 25 25

Scenario Dense 5 2

A. 192 bytes

B. 1536 bytes

C. 1600 bytes

D. 12800 bytes

Answer: B

7. An application on a test server is ready to be put into production. The production server already has three applications. What should you do to move the application from development to production?

A. Use the Application | Copy command.

B. Export data from the development application.

C. Copy the Essbase.sec file from development to production.

D. Copy the application directories from development to production.

Answer: B

8. Given that Product and Market are the only sparse dimensions, which file(s) would be restructured if a new member were added to the Product dimension?

A. none

B. data files only

C. index files only

D. both index and data files

Answer: C

9. If you have a production database named Sales, which files should be backed up to perform a complete system backup?

A. sales.db

B. sales.otn

C. essbase.sec

D. ess00001.ind

Answer: ACD

10. In the Outline in the exhibit, Year and Measures are dense dimensions. Data is loaded for every Month, Measure, Market and Scenario. After a CALC ALL is run, how many blocks are there?

A. 12

B. 18

C. 24

D. 30

Answer: A

11. What occurs upon execution of DISABLELOGIN in ESSCMD?

A. All server logins are disabled.

B. Logins to a specific database are disabled.

C. Logins to a specific application are disabled.

D. It logs out any users currently on a specific database.

Answer: C

12. If the average block density is between 10% and 90% and there are few consecutive repeating values or zeros, which data compression type is recommended?

A. RLE

B. Bit-Map

C. No Compression

Answer: B

13. If Committed Access is being used, which statements are true?

- A. It retains redundant data until a transaction commits.
- B. It acquires and releases Write locks as needed during the transaction.
- C. It retains Write locks on all affected blocks until the transaction commits.
- D. It does not restrict Read/Write access on data blocks during the transaction.

Answer: AC

14. What is the most efficient development tool to use for rapid deployment of formatted reports without requiring coding?

- A. Essbase Objects application
- B. basic Spreadsheet Add-In with template files
- C. Essbase Web Gateway deployed over their Intranet
- D. basic Spreadsheet Add-In with template files and Extended Spreadsheet Macros

Answer: B

15. The stored members in the dense dimension Scenario are Actual and Budget. Database A has Actual and Budget data loaded for all products in all markets. Database B has only the Budget data loaded. Which statement is true about Database B?

- A. The index would be half as large as Database A.
- B. Half the number of blocks exist as in Database A.
- C. Block density is reduced by 50% from Database A.
- D. Fifty percent fewer blocks would fit in the Data Cache as in Database A.

Answer: C

16. Given the Input data and the Outline in the exhibits, if Product and Market are sparse, which is an input level data block?

- A. East->Root Beer
- B. New York->Colas
- C. New York->Diet Cola
- D. New York->Root Beer

Answer: ABD

17. What would cause fragmentation in a database?

- A. deleting a dense member from the outline
- B. deleting a sparse member from the outline
- C. changing a member formula in the outline
- D. redefining a Stored dense dimension member as Dynamic Calc (Non-Store)

Answer: B

18. Within Database | Statistics, what does block density indicate?

- A. the actual number of blocks existing within the database
- B. the average percentage of data cells within each block that contain data
- C. the maximum possible number of blocks that could exist for this database
- D. the percentage of blocks that exist compared to the total potential number of blocks

Answer: B

19. What does the setting NETDELAY 500 represent?

- A. the number of times the network will retry a connection before failing and reporting an error
- B. the amount of time in seconds allowed to a Named Pipes network to establish a connection to your server
- C. the amount of time in milliseconds an unsuccessful operation waits before Essbase retries the operation

D. the number of seconds an Agent thread waits for a resource to become available so it can perform a specific action

Answer: C

20. Given the Outline in the exhibit, if Incremental Restructuring is enabled and Product and Market are the only sparse dimensions, what is the incremental restructuring implication if the Product dimension is moved after the Market dimension?

A. none

B. restructure deferred

C. overrides incremental restructuring and restructures data files only

D. overrides incremental restructuring and restructures index files only

E. overrides incremental restructuring and restructures both index and data files

Answer: D
