Sybase, Inc sybase adaptive server enterprise administrator professional

Practice Exam: 510-022 Exams

Exam Number/Code: 510-022

Exam Name: sybase adaptive server enterprise administrator professional

Questions and Answers: 120 Q&As

([Sybase, Inc Certification](#))

Exam : [510-022](#)

"sybase adaptive server enterprise administrator professional", also known as 510-022 exam, is a Sybase, Inc certification. With the complete collection of questions and answers, TestInside has assembled to take you through 120 Q&As to your 510-022 Exam preparation. In the 510-022 exam resources, you will cover every field and category in Sybase, Inc Certification helping to ready you for your successful Sybase, Inc Certification.

Quality and Value for the 510-022 Exam TestInside Practice Exams for Sybase, Inc **Sybase, Inc Certification** Certification 510-022 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 510-022 Exam.

510-022 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Sybase, Inc Certification product experts, included the current newest 510-022 examination questions.

3. 100% Guarantee to Pass Your Sybase, Inc Certification exam and get your Sybase, Inc Certification Certification.

If you do not pass the Sybase, Inc Certification 510-022 exam (sybase adaptive server enterprise administrator professional) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 510-022 Q&A ensure you pass the exam at your first try.

TestInside professional provide Sybase, Inc Certification 510-022 the newest Q&A, completely covers 510-022 test original topic. With our complete Sybase, Inc Certification resources, you will minimize your Sybase, Inc Certification cost and be ready to pass your 510-022 tests on Your First Try, 100% Money Back Guarantee included!

[Sybase, Inc 510-022](#) Test belongs to one of the Sybase, Inc Certification certified test, if needs to obtain the Sybase, Inc Certification certificate, you also need to participate in other related test, the details you may visit the [Sybase, Inc Certification](#) certified topic, in there, you will see all related Sybase, Inc Certification certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 510-022 exam

510-022 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

510-022 exam questions updated on regular basis

Same type as the certification exams, 510-022 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 510-022 exam demo before you decide to buy it in Test-Inside.com.

Exam : Sybase 510-022

Title : Sybase Adaptive Server Enterprise Administrator Professional

1. Given the following information from an allocation page, which of the following is NOT true?

OAMPG:5121 Extent ID 5336

Object ID is 1264004503

Index ID is 2

Allocation bitmap: 0xff

- A. None of the pages of this extent are in use.
- B. The OAM page for this table is page 5121.
- C. This table has a nonclustered index.
- D. The first page of this extent is 5336.

Answer: A

2. All of the following are causes of fragmentation in a table EXCEPT

- A. no clustered index
- B. page splits
- C. row level locking
- D. too many indexes

Answer: D

3. Which of the following dbcc commands can be run with a fix option?

- A. dbcc checkalloc.
- B. dbcc checkcatalog
- C. dbcc checkdb.
- D. dbcc checkstorage.
- E. dbcc checkverify.

Answer: A

4. When should dbcc reindex be used?

- A. after the sort order in ASE has been changed
- B. when a new language has been installed in ASE.
- C. when corruptions have been found in text/image page chains.
- D. when corruptions have been found in indexes on system tables.

Answer: A

5. How are OAM pages linked?

- A. Each OAM page is linked to its allocation page.
- B. Linear page chain for APL; not linked for DOL.
- C. No more than one OAM page per object, so no chain.
- D. OAM pages are circularly linked.

Answer: D

6. Which of the following is the minimum size for object allocation for ASE 12.5 with a logical page size of 16K?

- A. 16K
- B. 32K
- C. 64K
- D. 128K

Answer: D

7. Which of the following attributes are NOT set using sp_dbcc_updateconfig?

- A. Maximum number of worker processes to use.
- B. Size of the named cache to use.
- C. Sizes of the of the workspaces to use.
- D. Size of the extent IO buffer pool to use.

Answer: B

8. The first page on a device fragment must? (Choose 2)

- A. be listed in the lstart column of sysusages.
- B. be listed in the low column of sysdevices.
- C. be an OAM page.
- D. be an allocation page.
- E. have a logical page number that is a multiple of 1024.

Answer: AD

9. Which of the following pages is NOT found on an allocation unit?

- A. Data
- B. Index
- C. OAM
- D. GAM
- E. Control
- F. None of the above

Answer: E

10. The dbcc checkverify command should be run ?

- A. only once, to aid in configuring the dbccdb.
- B. prior to creation of a new index, to ensure the table's page linkage is accurate.
- C. prior to most dbcc commands, to ensure the database is in the proper state.
- D. immediately following the dbcc checkstorage command.
- E. immediately following any non-logged action.

Answer: D

11. Which SQL statement finds the first page of sysgams?

- A. select first from sysobjects where id = object_id("sysgams")
- B. select first from sysindexes where id = object_id("sysgams")
- C. select first from syscolumns where id = object_id("sysgams")
- D. select first from sysgams

Answer: B

12. For a database with its log on a separate device, which of the following dbcc commands show the percentage of free log space? (Choose 2)

- A. dbcc checkalloc
- B. dbcc checkcatalog
- C. dbcc checkdb
- D. dbcc checkstorage
- E. dbcc checktable

Answer: BD

13. How would you locate the first OAM page for a given table?

- A. has no fixed addresses
- B. listed in sysindexes.
- C. listed in sysobjects
- D. listed in the GAM page

Answer: B

14. Which of the following statements about named caches are true in ASE? (Choose 4)

- A. Named caches can be created dynamically.
- B. Named caches can be dropped dynamically.
- C. Named caches can be made larger dynamically.
- D. Named caches can be made smaller dynamically.
- E. Named cache partitions can be changed dynamically.
- F. Named cache replacement policies can be changed dynamically.

Answer: CDEF

15. Which of the following statements about the async log service async log service (DB option) Database options async log service is true?

- A. async log service is a server-wide configuration parameter.
- B. async log service can be enabled only in an ASE server with at least 4 engines.
- C. async log service is designed to improve ASE performance by performing transaction log I/O using the largest available buffer pool.
- D. When enable, the async log service functionality is performed by additional, dedicated ASE system processes.

Answer: BD

16. If a user-defined tempdb is unavailable at login the user will be placed in the system tempdb if ?

- A. the binding was created using the soft option.
- B. the binding was created using the hard option.
- C. user tempdb belongs to a group.
- D. the system tempdb is over 1 GB in size.

Answer: A

17. Consider the following page header:

PAGE HEADER:

pageno=720 nextpg=0 prevpg=0 objid=64000228 timestamp=0000 000022b5

nexttrno=5 level=0 indid=0 freeoff=150 minlen=6

How many data rows are currently on this page?

- A. 0
- B. 3
- C. 4
- D. 5
- E. 6
- F. Unknown

Answer: F

18. Which of the following are true about the mount/unmount commands?

- A. Mount detaches the database and its devices from ASE.
- B. Only 1 database can be unmounted in a single unmount command.
- C. The master database cannot be unmounted.
- D. The mount/unmount commands require sybase_ts_role.

Answer: C

19. How many allocation pages are created in a 4 MB database (assuming 4K page size)?

- A. 2
- B. 4
- C. 8
- D. 16

Answer: B

20. What dboption must be true to fix allocation errors on a system table?

- A. dbo only
- B. no free space acctng.
- C. select into/bulkcopy/pllsort
- D. single user
- E. trunc log on chkpt

Answer: D
